

## MARKET LEADERS IN REGIONAL & NARROW BODY AIRFRAME MAINTENANCE & TECHNICAL TRAINING

**KLM UK Engineering is a wholly owned subsidiary of AFI KLM E&M delivering aircraft maintenance & training services to the narrow body & regional market.**

### Products & Services

**Airframe Heavy Maintenance** — We have extensive airframe heavy maintenance capability at our Norwich (UK) base maintenance facility, offering high quality services ranging from heavy C Checks to complex modification programmes including end-of-lease handback checks & decommissioning.

**Line Maintenance** — With numerous locations in the UK we have extensive capability to support both narrow body & regional aircraft. We also have the ability to set up new locations at short notice for both the short & long term.

**Technical Training** — Situated within the International Aviation Academy Norwich, the training organisation provides both basic & type training on current & new generation aircraft including the Boeing 737MAX. We also provide virtual learning to various organisations worldwide, as well as apprenticeships & degree programmes.

**Component Repair Centre** — Located within our main base there is an extensive-site Component Repair Centre/NDT facility supporting all base maintenance activities, a high quality of modifications, repairs, overhaul & inspections, as well as stand alone third party work. For information on up to date parts capability lists, for over 500 products, please see the website.

**Customer Benefits** — KLM UK Engineering has an experienced & skilled work force that continue to focus on delivering a high quality product, reliable turn-around-time, adaptive solutions & competitive prices. Our product portfolio allows us to offer our customers a variety of products to meet their aircraft maintenance & training needs, all of which insures total value to the customer.
